Leir education: A Journey of Growth and Excellence: Founded in 2013 by husband-and-wife duo Peter Donnelly and Rosa Terrassa, Leir Education started with summer language programmes designed for Spanish children and adults to experience immersive learning in Ireland. Over the years, the success and organic growth of these initiatives led to the creation of the Leir Language Academy, broadening the organisation's offerings to include teaching Spanish and English (ESL) alongside other educational pursuits.

Today, Leir Education provides a diverse range of programs, such as summer camps, year-round educational initiatives, Erasmus opportunities, work experience placements, school stays, and homestay arrangements. All these programs are founded on Leir Education's core values of outstanding service, quality, safety, and care, guaranteeing enriching and transformative experiences for both participants and partners.

Leir Education Launches 'School & group Trips to Spain' Programs: As 2024 drew to a close, Leir Education is thrilled to introduce its eagerly anticipated School & group Trips to Spain program. This innovative initiative preserves the legacy of language education while providing Irish students with the opportunity to enhance their social, team and language skills in vibrant, activity-rich settings. All our monitors and team are bilingual, so not studying or speaking Spanish is not a problem, as our trips are designed to enhance each participant's experience and learning. In its commitment to excellence, Leir Education has achieved full membership with the Irish Aviation Authority (IAA), becoming a fully bonded and licensed travel agent. This accreditation fulfils the rigorous Department of Education standards for school tours and group travel, ensuring participants receive extensive financial and safety protection.

The School Trips in Spain program reflects our commitment to delivering engaging, high-quality, and culturally enriching educational experiences. We are excited to introduce this exclusive offering and invite you to join us on this remarkable new journey!

At a time when nature is giving clear signals that global warming is causing dramatic changes in the global ecology of our planet and with the human population approaching eight billion, education and awareness have become the last hope to achieve the changes necessary to correct the devastating footprint of our species.
